SAMIN ZAMAN

Software Quality Assurance | Test Automation | API Testing

saminzaman7@gmail.com | +880 1782544162 | Dhaka, Bangladesh | Github: github.com/samin-Zaman1

PROFESSIONAL SUMMARY

Software QA Engineer with nearly 3 years of experience in manual testing, test automation, API testing, regression testing, UAT, and CI/CD across SaaS products. Experienced in Playwright, TypeScript, Postman, REST APIs, Swagger/OpenAPI, GitHub Actions, Jira, and Agile/Scrum.

PROFESSIONAL EXPERIENCE

Quality Assurance Engineer June 2023 – March 2026

Sense n Respond LLC – SaaS Company Remote, USA

- Built 2 Playwright test suites from scratch in TypeScript using the Page Object Model, automating repetitive manual regression checks and integrating them into GitHub Actions CI/CD.
- Performed release sign-off for 3 SaaS products, defining acceptance criteria, validating builds against requirements, and conducting pre-release regression and UAT testing to identify regressions before deployment.
- Tested REST APIs in Postman across 25+ sprints, using Swagger/OpenAPI specifications as the reference for expected behavior, and performed load testing to evaluate platform behavior under increased usage.
- Tested the browser extension for a bug management platform that captures screen recordings, console logs, and network activity; worked on Time Travel, a feature that rewinds the previous 30 seconds to reproduce issues.
- Performed manual and functional testing of new features every sprint in an Agile/Scrum environment, collaborating closely with Product and Engineering.
- Logged and documented defects in Jira with clear reproduction steps, expected behavior, and supporting evidence, then tracked them through resolution; maintained test documentation and QA checklists across 15+ modules.
- Wrote end-user guides and product documentation for the API testing and governance platform and the bug tracking platform.

SKILLS AND TOOLS

Test Automation: Page Object Model, Regression Suites, CI Integration, Test Framework Design

API and Performance Testing: REST API Testing, Load Testing, Data Validation

Manual and Functional Testing: Test Case Design, Exploratory Testing, Regression Testing, UAT

Process: Defect Lifecycle Management, Test Planning, Test Documentation, Agile/Scrum, AI-Assisted Testing

Tools: Playwright, TypeScript, Postman, Swagger/OpenAPI, Git/GitHub, GitHub Actions, Chrome DevTools, Jira, SQL

EDUCATION

Bachelor of Science in Computer Science and Engineering 2018 – 2023

North South University, Dhaka, Bangladesh

PROJECTS

Professional

All Things API – AI-Powered API Management Platform | Postman, Swagger/OpenAPI, Jira

Tested AI-powered API testing, automated documentation, code generation, and rule validation across 25+ sprints. Translated requirements into test cases and release checks, tested APIs against Swagger/OpenAPI specifications, and worked with Engineering to resolve defects. Also wrote end-user and product documentation.

Sniffer – AI-Powered Bug Reporting SaaS | Playwright, Chrome DevTools, Jira

Tested the bug reporting platform and its browser extension, covering screen recordings, console logs, network activity, Jira integrations, and Time Travel, which rewinds the last 30 seconds of a session for bug reproduction. Verified that captured recordings, logs, and network data were preserved correctly in generated bug reports.

Personal

Pharmacy Inventory System | Next.js, TypeScript, PostgreSQL, Playwright | github.com/Samin-Zaman1/bangla-medical-hall

Built a pharmacy POS and inventory system covering billing, batch/expiry tracking, customer credit, and AI invoice reading with human review. Wrote ~300 automated tests across unit, component, database, and Playwright E2E layers and implemented GitHub Actions CI/CD, CodeQL, smoke tests, automatic rollback, and nightly cross-browser testing.

SauceDemo QA Suite | Playwright, TypeScript, GitHub Actions | github.com/Samin-Zaman1/saucedemo-qa-suite

Built 38 UI and API tests in Playwright using the Page Object Model and custom fixtures, covering login, cart, checkout totals, sorting, and a REST API. Found and documented 11 defects as expected-failure tests, including a rounding error in the checkout total on the standard user's purchase path. CI typechecks and runs the suite on every pull request and publishes the HTML test report to GitHub Pages.

TypeScript Data Validation Library | TypeScript, Vitest, Zod, GitHub Actions | github.com/Samin-Zaman1/recordguard

Built a library that loads API data with retries and validates every record at runtime, returning valid and rejected records with reasons instead of crashing. Reached 100% test coverage, plus a CI test that installs the real npm package and runs it against a failing-then-recovering HTTP server on Node 22 and 24.

EXTRACURRICULAR ACTIVITIES

Event & Content Writing Coordinator *2018 – 2022*

IEEE NSU Student Branch & IEEE NSU WIE Affinity Group

- Planned and managed events promoting technology and women in engineering across 10+ university programmes.
- Managed content writing and coordination across multiple communication channels throughout university.
